

**Citibank, N.A. South Africa Branch**

**Pillar 3 Disclosure: Annual**

**31 December 2021**

## TABLE OF CONTENTS

1.	Introduction to Citibank N.A South Africa	
2.	Basis of preparation	
3.	Management's responsibility statement	
4.	Overview of risk management and RWA	
4.1	KM1 - Key metrics (Quarterly)	Quantitative
4.2	OVA – Bank risk management approach (Annual)	Qualitative
4.3	OV1 – Overview of RWA (Quarterly)	Quantitative
5.	Linkages between financial statements and regulatory exposures	
5.1	LI1 – Differences between accounting and regulatory scopes of consolidation and mapping of financial statements with regulatory risk categories (Annual)	Quantitative
5.2	LI2 – Main sources of differences between regulatory exposure amounts and carrying values in financial statements (Annual)	Quantitative
5.3	PV1 – Prudent valuation adjustments (PVA) (Annual)	Quantitative
6.	Composition of capital	
6.1	CC1 – Composition of regulatory capital (Semi-annual)	Quantitative
6.2	CC2 – Reconciliation of regulatory capital to balance sheet (Semi-annual)	Quantitative
7.	Leverage ratio	
7.1	LR1 – Summary comparison of accounting assets vs leverage ratio exposure measure (Quarterly)	Quantitative
7.2	LR2 – Leverage Ratio common disclosure template (Quarterly)	Quantitative
8.	Liquidity	
8.1	LIQA – Liquidity risk management (Annual)	Qualitative
8.2	LIQ1 – Liquidity Coverage Ratio (LCR) (Quarterly)	Quantitative
8.3	LIQ 2 – Net Stable Funding Ratio (NSFR) (Semi-annual)	Quantitative
9.	Credit Risk	
9.1	CRA – General information about credit risk (Annual)	Qualitative
9.2	CR1 – Credit quality of assets (Semi-annual)	Quantitative
9.3	CRB – Additional disclosure related to the credit quality of assets (Semi-annual)	Qualitative & Quantitative
9.4	CRC – Qualitative disclosure requirements related to credit risk mitigation techniques (Annual)	Qualitative
9.5	CR3 – Credit risk mitigation techniques – overview (Semi-annual)	Quantitative
9.6	CRD – Qualitative disclosures on banks' use of external credit ratings under the standardised approach for credit risk (Annual)	Qualitative
9.7	CR4 – Standardised approach – credit risk exposure and Credit Risk Mitigation (CRM) effects (Semi-annual)	Quantitative
9.8	CR5 – Standardised approach – exposures by asset classes and risk weights (Semi-annual)	Quantitative
10.	Counterparty credit risk	
10.1	CR5 – Standardised approach – exposures by asset classes and risk weights (Semi-annual)	
10.2	CCRA – Qualitative disclosure related to counterparty credit risk (Annual)	Qualitative
10.3	CCR1 – Analysis of counterparty credit risk (CCR) exposure by approach (Semi-annual)	Quantitative
10.4	CCR2 – Credit valuation adjustment (CVA) capital charge (Semi-annual)	Quantitative
10.5	CCR3 – Standardised approach of CCR exposures by regulatory portfolio and risk weights (Semi-annual)	Quantitative
11.	Market Risk	
11.1	MRA – Qualitative disclosure requirements related to market risk (Annual)	Qualitative
11.2	MRC – The structure of desks for banks using the IMA (Annual)	Quantitative
11.3	MR2 – RWA flow statements of market risk exposures under an IMA (Quarterly)	Quantitative
11.4	MR3 – IMA values for trading portfolios (Semi-annual)	Quantitative
11.5	MR4 – Comparison of VaR estimates with gains/losses (Semi-annual)	Quantitative

12. Interest rate risk in the banking book	
12.1 IRRBBA – IRRBB risk management objective and policies (Annual)	Qualitative
12.2 IRRBB1 – Quantitative information on IRRBB (Annual)	Quantitative
13. Operational Risk	Qualitative
13.1 Operational Risk RWA's	Quantitative
14. Remuneration	
14.1 REMA – Remuneration policy (Annual)	Qualitative
14.2 REM1 – Remuneration awarded during the financial year (Annual)	Quantitative
14.3 REM2 – Special payments (Annual)	Quantitative
14.4 REM3 – Deferred remuneration (Annual)	Quantitative

## 1. INTRODUCTION

Citibank, N.A. is incorporated in the United States of America and has a national bank charter under the National Bank Act of 1863 with the ability to open branches, establish subsidiaries and provide products and services to clients globally. Citibank, N.A. is regulated by The Office of the Comptroller of Currency (OCC). This is the bank's primary regulator and is authorized to examine and supervise the bank on a consolidated global basis. The Federal Deposit Insurance Corporation (FDIC) oversees the federal deposit insurance fund that insures deposits with the bank in the United States and therefore examines the bank as well.

Citibank, N.A. is an indirect wholly owned subsidiary of Citigroup Inc. (Citigroup). This financial holding company is domiciled in the United States of America and is listed on the New York, Tokyo as well as the Mexico Stock Exchanges. The Federal Reserve (Fed) is the primary prudential regulator of Citigroup Inc.

Citibank, N.A. (Registration number 1995/007396/10) was authorized by the Office of the Registrar of Banks at the South African Reserve Bank (SARB) to conduct the business of a bank by means of a branch in South Africa in July 1995. The local branch is now supervised by the Prudential Authority ("PA"). The branch is required to adhere to the various prudential requirements as set out in the Banks Act 94 of 1990 ("Banks Act"), as amended, and Regulations relating to Banks.

Members of the general public may access further comprehensive information as contained in the Citi Annual Report, as well as view regulatory filings of Citi and the bank by visiting [www.citigroup.com](http://www.citigroup.com)

## 2. BASIS OF PREPARATION

The purpose of this public disclosure is to provide detailed information on Citibank, N.A South Africa Branch ("Citi SA") capital structure, capital adequacy, risk exposure and risk-weighted assets ("RWA"), leverage ratio and liquidity ratios as of 31 December 2021.

The following public disclosure presents the annual Pillar 3 disclosure of Citi SA which has been prepared in accordance with the South African Banks Act Regulation 43 *Public Disclosure* and Directive 1 of 2019 *Matters related to Pillar 3 disclosure requirements framework*, as well as the BCBS standards which have been applied. Further selective information on the monthly filings by Citi SA to the SARB may be obtained by visiting [www.resbank.co.za](http://www.resbank.co.za)

The 31 December 2021 financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") and reported in accordance with the Regulations relating to Banks. The financial statements are audited on an annual basis by an independent audit firm.

The Pillar 3 Disclosure document has been independently reviewed by an external audit firm prior to publication.

The Pillar 3 Disclosure document has been prepared and presented using local currency - South African Rand (ZAR'000).

## 3. MANAGEMENT'S RESPONSIBILITY STATEMENT

Citi SA management is responsible for the preparation and fair presentation of the annual financial statements of the Branch, comprising the statement of financial position as of 31 December 2021, and disclosure requirements in respect of Regulation 43 of the Regulations relating to Banks.

The Pillar 3 Disclosure document has been verified internally by senior management in accordance with Citi's policies on disclosure, financial reporting and governance processes.

## 4. OVERVIEW OF RISK MANAGEMENT AND RWA

### 4.1 TEMPLATE KM1: KEY METRICS (QUARTERLY)

The key prudential metrics relate to regulatory capital, leverage ratio and liquidity standards related to Citi SA. Citi SA's capital and leverage position is managed within the risk appetite framework. No transitional arrangement with regards to implementation of IFRS 9 for the impact of expected credit loss accounting on regulatory capital have been applied.

Citi SA is subject to regulatory capital standards issued by the SARB. These rules establish an integrated capital adequacy framework, encompassing both risk-based capital ratios and leverage ratios. Citi SA manages its balance sheet proactively, with a particular focus on the efficient management of RWA.

Citi SA is not highly leveraged, with a leverage ratio of 8.90%, above the minimum leverage ratio requirement of 4%.

19 Total required stable funding	21,520,642	26,001,227	22,456,938	20,768,405	20,563,134
20 NSFR ratio	176.73%	154.36%	181.47%	177.58%	178.47%

Directive 2 of 2020 *Matters related to temporary capital relief to alleviate risks posed by the Covid-19 pandemic* issued on 6 April 2020 directed banks to reduce its Pillar 2A temporarily to zero. Citi SA remained adequately capitalised with a Common Equity Tier 1 (CET1) ratio of 19.92%, well ahead of the current regulatory minimum requirement of 11.25%.

Directive 1 of 2020 *Temporary measures to aid compliance with the liquidity coverage ratio during the Coronavirus (Covid-19) pandemic stress period* issued 31 March 2020, directed banks to comply with a revised minimum LCR requirement of 80%, with effect from 1 April 2020. Citi SA LCR at 399.23% was well above the minimum requirement of 80% and NSFR at 176.73%, also above the minimum requirement of 100%.

## 4.2 TEMPLATE OVA: OVERVIEW OF RISK MANAGEMENT (QUARTERLY)

The mission of Citi SA is to responsibly provide financial services that enable economic growth and progress as a trusted partner to its clients and to deliver sustainable, growing earnings across all its businesses while protecting capital and liquidity.

Citi SA has a comprehensive risk governance framework in place to provide oversight of the Branch's monitoring and management of risks, ensuring that the risk profile of Citi SA is well documented and pro-actively managed at all levels of the organisation so that Citi SA's financial strength is safeguarded. The framework applies to Citi SA in its entirety, including all businesses and functions.

Risk governance at Citi SA is cascaded through risk frameworks and risk policies, which describe how Citi SA identifies, measure, mitigates, monitors and reports material risk. This ensures transparent lines of responsibility and accountability for the core risk governance processes performed by the Branch.

The risk management framework is based on a 'three lines of defense' governance model, whereby each line has a specific role and defined responsibilities in such a way that the execution of tasks is separated from the control of the same tasks. The three lines of defense also collaborate with each other in structured fora and through formalised processes to bring various perspectives together and to lead the Branch toward outcomes that are in clients' and shareholders' interests, create economic value and are systemically responsible.

Each of Citi SA's businesses (the first line of defense) owns and manages the risks inherent in or arising from the business and is responsible for establishing and operating controls to mitigate key risks, performing manager assessments of the design and effectiveness of internal controls, and promoting a culture of compliance and control.

Citi SA's independent control functions (the second line of defense), including Independent Risk Management, Finance, Independent Compliance Risk Management, Legal, and Human Resources ("HR"), set standards against which business, operations and control functions are required to manage and oversee risks, including compliance with applicable laws, regulatory requirements, and policies and standards of ethical conduct. These functions are involved in identifying, measuring, monitoring, or controlling aggregate risks, and are independent from front line units.

Citi SA's Internal Audit function (the third line of defense) independently reviews activities of the first two lines of defense, based on a risk-based audit plan and methodology approved by the Audit Committee.

These disclosures provide details of Citi SA's exposure to risk and describes the methods used by management to manage risk. The most important types of financial risk to which Citi SA is exposed is credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and equity price risk.

## 4.3 TEMPLATE OV1: OVERVIEW OF RWA (QUARTERLY)

### 5.2 TEMPLATE LI2: MAIN SOURCES OF DIFFERENCES BETWEEN REGULATORY EXPOSURE AMOUNTS AND CARRYING VALUES IN FINANCIAL STATEMENTS (ANNUAL)

	a	b				e
		Total	Items subject to:			
			Credit risk framework, MZAR	Securitisation framework	Counterparty credit risk framework	
Asset carrying value amount under scope of regulatory consolidation (as per template LI1)	85,322,384	77,850,835	-	-	981,975	
Total net amount under regulatory scope of consolidation						
Off-balance sheet amounts	47,227,422	47,227,422				
Differences in valuations and other	646,484	646,484				
<b>Exposure amounts considered for regulatory purposes</b>	<b>133,196,290</b>	<b>125,724,741</b>			<b>981,975</b>	

### 5.3 TEMPLATE PV1: PRUDENT VALUATION ADJUSTMENTS (PVA) (ANNUAL)

Directive 5 of 2020 *Prudent Valuation Adjustments (PVA) Framework* requires Citi SA to provide PVA disclosure on an annual basis. Citi SA assessed and determined that PVA is applicable due to the instruments traded as of 31 December 2021.

Citi SA, in consultation with Citi entities that are under the European Banking Authority (EBA), have established and maintain processes and procedures for considering relevant valuation adjustments. Citi SA does not hold model/valuation reserve for the global valuation models used for pricing the derivatives. Citi SA trades vanilla foreign exchange and interest instruments and there is no reduced liquidity uncertainty for these instruments or complex products traded

where individual valuation adjustments would be deemed necessary. Thus, Citi SA has determined PVA's on an overall level.

Citi SA determines PVAs under the simplified approach. Citi SA calculates the PVA under the simplified approach as 0.1% of the sum of absolute value of fair-valued assets and liabilities which are included in the materiality threshold calculation.

Citi SA determines the aggregate PVA monthly and is reported on form BA 700: Capital Adequacy and Leverage Ratio. PVA as of 31 December 2021 was R25 620 626, of which:

- in the trading book: R13 533 558
- in the banking book: R12 087 069

## **6. COMPOSITION OF CAPITAL**

Citi SA's capital management framework is designed to ensure that adequate capital consistent with its risk profile, management targets and all applicable regulatory standards and guidelines (including Basel III deduction requirements) are maintained. There were no significant changes to Citi SA's regulatory capital over the reporting period.

The following tables present the semi-annual components of Citi SA's composition of regulatory capital and reconciliation of regulatory capital to balance sheet as of 31 December 2021.

**6.1 TEMPLATE CC1: COMPOSITION OF REGULATORY CAPITAL (SEMI-ANNUAL)**

		a	b
		Amounts [in'000 ZAR]	reference numbers/letters of the balance sheet under the regulatory scope of consolidation *
<b>Common Equity Tier 1 capital: instruments and reserves</b>			
1	Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus	2,604,857	
2	Retained earnings	6,974,199	
3	Accumulated other comprehensive income (and other reserves)	160,348	
4	Directly issued capital subject to phase-out from CET1 (only applicable to non-joint stock companies)	0	
5	Common share capital issued by subsidiaries and held by third parties (amount allowed in group CET1)	0	
6	Common Equity Tier 1 capital before regulatory adjustments	8,197,021	
<b>Common Equity Tier 1 capital: regulatory adjustments</b>			
7	Prudent valuation adjustments	25,621	
8	Goodwill (net of related tax liability)	0	
9	Other intangibles other than mortgage servicing rights (net of related tax liability)	0	
10	Deferred tax assets that rely on future profitability, excluding those arising from temporary differences (net of related tax liability)	0	
11	Cash flow hedge reserve	0	
12	Shortfall of provisions to expected losses	0	
13	Securitisation gain on sale (as set out in paragraph 36 of Basel III securitisation framework <sup>25</sup> )	0	
14	Gains and losses due to changes in own credit risk on fair valued liabilities	0	
15	Defined benefit pension fund net assets	0	
16	Investments in own shares (if not already subtracted from paid-in capital on reported balance sheet)	0	
17	Reciprocal cross-holdings in common equity	0

## 7. LEVERAGE RATIO

The Basel III leverage ratio is a non-risk sensitive ratio used to restrict the build-up of leverage in the banking sector to avoid destabilising deleveraging processes that can damage the broader financial system and the economy. It compares the Tier 1 capital to the total exposure (including off balance sheet items) on a non-risk weighted basis.

Citi SA's Basel III leverage ratio calculated in accordance with the Banks Act, was 8.90% on 31 December 2021, lower than 8.81% on 31 December 2020, however above the regulatory minimum requirement of 4%. The decline from prior year was driven by lower capital balances after repatriating capital to Citigroup. There were no significant changes to Citi's leverage position over the reporting period.

Citi SA's leverage position is managed within the Citigroup Global Risk Appetite framework. The leverage ratio is also calculated and presented to the ALCO every month.

The following tables present Citi SA's summary comparison of accounting assets versus leverage ratio exposure amount and leverage ratio common disclosure as of quarter ended 31 December 2021.

### 7.1 TEMPLATE LR1: SUMMARY COMPARISON OF ACCOUNTING ASSETS VS. LEVERAGE RATIO EXPOSURE AMOUNT (QUARTERLY)

		a
		Dec-21
1	Total consolidated assets as per published financial statements	83,358,552
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-
4	Adjustments for temporary exemption of central bank reserves (if applicable)	-
5	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
6	Adjustments for regular-way purchases and sales of financial assets subject to trade date accounting	-
7	Adjustments for eligible cash pooling transactions	-
8	Adjustments for derivative financial instruments	453,348
9	Adjustment for securities financing transactions (ie repurchase agreements and similar secured lending)	- 0
10	Adjustment for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)	8,859,392
11	Adjustments for prudent valuation adjustments and specific and general provisions which have reduced Tier 1 capital	-
12	Other adjustments	-
13	Leverage ratio exposure measure	91,764,596

<b>Leverage ratio</b>			
25	Basel III leverage ratio (including the impact of any applicable temporary exemption of central bank reserves)	8.90%	8.45%
25a	Basel III leverage ratio (excluding the impact of any applicable temporary exemption of central bank reserves)	8.90%	8.45%
26	National minimum leverage ratio requirement	4.00%	4.00%
27	Applicable leverage buffers	-	-

## 8. LIQUIDITY

### 8.1 TEMPLATE LIQA: LIQUIDITY RISK MANAGEMENT (ANNUAL)

Liquidity is the ability of an institution to fund increases in assets and meet obligations as they fall due at a reasonable cost. Thus, it is the risk that Citi SA will not be able to efficiently meet both expected and unexpected current and future cash flow and collateral needs without adversely affecting either daily operations or the financial condition of Citi SA. Adequate and diverse sources of funding and liquidity are essential to Citi SA's business. Citi's sources of funding include deposits and short-term borrowings primarily in the form of secured funding transactions.

Funding and liquidity risks arise from several factors, many of which are mostly or entirely outside Citi SA's control, such as disruptions in the financial markets, changes in key funding sources, credit spreads, changes in macroeconomic, geopolitical and other conditions, reduced access to sources of funding, or increased demands on the available funding of Citi SA.

Liquidity risk includes both the risk of being unable to fund assets at appropriate maturities and rates and the risk of being unable to liquidate an asset at a reasonable price and in an appropriate time frame. Citi SA has access to Head Office funding and strives to maintain a balance between continuity of funding and flexibility using liabilities with a range of maturities.

Citi SA's funding and liquidity management objectives are aimed at:

- funding the existing asset base,
- growing the core businesses
- maintaining sufficient liquidity, structured appropriately, so that Citi SA can operate under a variety of adverse circumstances, including potential Company-specific and/or market liquidity events in varying durations and severity, and
- satisfying regulatory requirements, including, among other things, those related to the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR). Citi SA's goal is to maintain sufficient funding in amount and tenor to fully fund customer assets and to provide an appropriate amount of cash and high-quality liquid assets (HQLA), even in times of stress, to meet its payment obligations as they come due.

Citi SA's funding and liquidity framework ensures that the tenor of funding sources is of sufficient term in relation to the tenor of its asset base. The goal of Citi SA's asset/liability management is to ensure that there is excess liquidity and tenor in the liability structure relative to the liquidity profile of the assets. This reduces the risk that liabilities will become due before assets mature or are monetized. This excess liquidity is held primarily in the form of HQLA.

The liquidity position of the legal vehicle is managed as a part of Citigroup's Global Liquidity Risk Management Policy ("LRM Policy"). Citigroup's Global LRM Policy establishes the framework for defining, measuring, limiting and reporting liquidity risk to ensure the transparency and comparability of liquidity risk-taking activities. It also provides for the establishment of an appropriate risk appetite and liquidity risk management strategies. The Global LRM Policy applies to Citigroup Inc., its consolidated subsidiaries and managed affiliates (Citibank, N.A. (CBNA)). The Global LRM Policy is supplemented by the Standards for Liquidity Risk Management Planning and Reporting.

The following are part of the LRM Policy, amongst other things:

- Liquidity Risk Management Framework
- Liquidity Monitoring and Escalation
- Liquidity Stress Continuum
- Citi Support Agreement
- Balance Sheet Funding and Liquidity Plan
- Contingency Funding Plan
- Intraday Liquidity Management Plan
- Cash Flow Projections
- Funding & Liquidity Assessment of New Products
- Internal Metrics and Stress Test Assumption Changes

- Cash flow forecast back-testing
- HQLA monetisation plan
- Intraday Monitoring, management & Reserving Procedures

Citi SA adopts the Global LRM Policy. Citi monitors its liquidity position against internal and external metrics, including thresholds and limits. Internal metrics are defined in the Global LRM Policy and monitored independently, including liquidity planning, balance sheet stress reporting. External metrics include unencumbered assets, Top 5 depositors, liquid assets ratio, endowment capital ratio and cash reserve ratio. In addition, Basel III liquidity metrics which include the Liquidity Coverage Ratio (“LCR”) and Net Stable Funding Ratio (“NSFR”).

Citi SA’s liquidity is managed by the Country Legal Entity (CLE) Treasurer, with independent oversight provided by Independent Risk Management. The CLE Treasurer is overseen by the local ALCO, being the primary governance committees for the balance sheet. The CLE Treasurer is supported by Treasury and Finance function in implementing the Global LRM Policy.

Citi SA continually assesses liquidity risk by identifying and monitoring changes in funding requirements to meet business goals and targets set in terms of the overall branch strategy. In addition, Citi SA holds a portfolio of liquid assets as part of its liquidity risk management strategy.

The LCR is intended to measure the amount of HQLA held by Citi SA in relation to estimated net cash outflows within a 30-day period during an acute stress event. The NSFR aims to promote resilience over a longer time horizon by creating incentives for banks to fund their activities with more stable sources of funding on an ongoing basis.

Directive 1 of 2020 *Temporary measures to aid compliance with the liquidity coverage ratio during the Coronavirus (Covid-19) pandemic stress period* issued 31 March 2020, directed banks to comply with a revised minimum LCR requirement of 80%, with effect from 1 April 2020. The minimum NSFR requirement is 100%.

Citi SA did not breach the minimum LCR and NSFR requirements during 2021.

Citi SA holds certain unencumbered high quality, liquid assets that are available to raise liquidity if required. Citi SA did not breach its liquid asset requirement during 2021.

The following tables present Citi SA's LCR and NSFR ratio as of quarter ending 31 December 2021.

## 8.2 TEMPLATE LIQ1: LIQUIDITY COVERAGE RATIO (LCR) (QUARTERLY)

The strong liquidity and funding position can be evidenced by the LCR of 399.23% (2020: 253.08%). LIQ1 has been prepared based on averages over the financial reporting period (i.e. the average of components and the average LCR over the most recent three months of daily positions, irrespective of the financial reporting schedule) per Basel III Pillar 3 requirements.

The composition of Citi SA's HQLA is Treasury bills, Repos / Reverse Repos, Government and government-guaranteed securities and short traded bonds.

	Total unweighted value (average)	Total weighted value (average)
	Dec-21	Dec-21
<b>High-quality liquid assets</b>		
1 Total HQLA	28,451,868	27,487,236
<b>Cash outflows</b>		
2 Retail deposits and deposits from small business customers, of which:	-	-
3 Stable deposits	-	-
4 Less stable deposits	-	-
5 Unsecured wholesale funding, of which:	61,860,672	34,068,441
6 Operational deposits (all counterparties) and deposits in networks of cooperative banks	-	-
7 Non-operational deposits (all counterparties)	61,860,672	34,068,441
8 Unsecured debt	-	-
9 Secured wholesale funding	410,945	-
10 Additional requirements, of which:	-	-
11 Outflows related to derivative exposures and other collateral requirements	-	-
12 Outflows related to loss of funding of debt products	-	-
13 Credit and liquidity facilities	-	-
14 Other contractual funding obligations	41,257,931	2,352,084
15 Other contingent funding obligations	-	-
16 TOTAL CASH OUTFLOWS	103,878,735.69	36,420,525
<b>Cash inflows</b>		
17 Secured lending (eg reverse repo)	-	-
18 Inflows from fully performing exposures	-	-
19 Other cash inflows	-	-
20 TOTAL CASH INFLOWS	32,944,006	29,535,474
		Total adjusted value
21 Total HQLA		27,487,236
22 Total net cash outflows		6,885,051
23 Liquidity coverage ratio (%)		399.23%

Number of data points: 61

Citi does not hold any level two high-quality liquid assets (level 2A high-quality liquid assets and level 2B high-quality liquid assets).

Weighted figures of HQLA have been calculated after the application of the respective haircuts but before the application of any caps on Level 2B and Level 2 assets.

Unweighted inflows and outflows have been calculated as outstanding balances. Weighted inflows and outflows have been calculated after the application of the inflow and outflow rates.

Adjusted HQLA have been calculated after the application of both (i) haircuts and (ii) any applicable caps (i.e., cap on Level 2B and Level 2 assets). Adjusted figures of net cash outflows have been calculated after the application of both (i) inflow and outflow rates and (ii) any applicable cap (i.e., cap on inflows).

### 8.3 TEMPLATE LIQ2: NET STABLE FUNDING RATIO (NSFR) (QUARTERLY)

Citi SA's NSFR exceeded the minimum requirement of 100% effective 1 January 2018, during December 2021 at 176.73% (2020: 178.47%).

	Unweighted value by residual maturity				Weighted value	Unweighted value by residual maturity				Weighted value

## 9. CREDIT RISK

### 9.1 TEMPLATE CRA: GENERAL QUALITATIVE INFORMATION ABOUT CREDIT RISK (ANNUAL)

Credit risk is the risk that a counterparty may be unable or unwilling to make a payment or fulfill contractual obligations. When characterizing credit risk, the Exposure at Default, Probability of Default, and Loss Given Default are the key aspects.

Credit risk arises in many of Citi SA's business activities, including:

- consumer, commercial and corporate lending
- capital markets derivative transactions
- structured finance
- securities financing transactions (repurchase and reverse repurchase agreements, and securities loaned and borrowed)

Citi SA is subject to credit risk through its trading and lending activities and in cases where it acts as an intermediary on behalf of customers or other third parties or issues guarantees. Credit risk also arises from settlement and clearing activities when Citi SA transfers an asset in advance of receiving its counter-value or advances funds to settle a transaction on behalf of a client. The risk that counterparties to both derivative and other instruments might default on their obligations is monitored on an ongoing basis. Citi SA's primary exposure to credit risk arises through its loans and advances. In addition, Citi SA is exposed to off balance sheet credit risk through commitments to extend credit and guarantees issued. Concentration risk, within credit risk, is the risk associated with having credit exposure concentrated within a specific client, industry, region or other category.

Credit risk is one of the most significant risks Citi faces as an institution. As a result, Citi SA has a well-established Institutional Client Group ("ICG") Risk Management Manual in place for managing credit risk across all businesses. This includes a defined risk appetite, credit limits and credit policies, both at the business level as well as at the Company-wide level.

Citi SA's credit risk management also includes processes and policies with respect to problem recognition, including "remedial management," portfolio reviews, stress tests, review of risk ratings and classification triggers. With respect to Citi SA's settlement and clearing activities, the utilization of intraday client lines is monitored against limits, as well as against usage patterns. To the extent that there are risk concerns, Citi SA would review the client credit strategy, which may include moving exposure to a secured (collateralized) structure. Citi SA's intraday settlement and clearing lines are uncommitted and cancellable at any time. Citi SA has a credit risk appetite which is managed by using various limits and approval requirements, which is the level of risk acceptable in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and are subject to an annual review or more frequent review. All credit limits are closely monitored against limits and should credit risks elevate, Citi SA would reduce credit limits to the client or move to a secured (collateralised) facility structure.

To manage concentration of risk within credit risk, Citi SA has in place a framework consisting of industry limits, an idiosyncratic framework consisting of single name concentrations for each business and across Citigroup and a specialized framework consisting of product limits. The exposure to any one borrower is further restricted by sub-limits covering on and off-balance sheet exposures. Exposure to credit risk is managed through the regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral and corporate and personal guarantees, but a significant portion is lending where no such facilities can be obtained.

Credit exposures are generally reported in notional terms for accrual loans, reflecting the value at which the loans as well as loan and other off-balance sheet commitments are carried on the Balance Sheet. Credit exposure arising from capital markets activities is generally expressed as the current mark-to-market, net of margin, reflecting the net value owed to Citi by a given counterparty. The credit risk associated with these credit exposures is a function of the idiosyncratic creditworthiness of the obligor, as well as the terms and conditions of the specific obligation. Citi assesses the credit risk associated with its credit exposures on a regular basis through its loan loss reserve process as well as through regular stress testing at the company, business, geography and product levels. These stress-testing processes typically estimate potential incremental credit costs that would occur as a result of either downgrades in the credit quality or defaults of the obligors or counterparties.

Citi SA adopts the Standardised Approach to credit risk as of 31 December 2021.

Directive 3 of 2020 *Matters related to the treatment of restructured credit exposures due to the Coronavirus (Covid-19) pandemic* issued on 6 April 2020 outlined specific considerations to be made by banks when a loan is being restructured. Citi SA did not have any restructured credit exposures during 31 December 2021.

## 9.2 TEMPLATE CR1: CREDIT QUALITY OF ASSETS (SEMI-ANNUAL)

	Gross carrying values of		Allowances/ impairments	Of which ECL accounting provisions		Of which ECL accounting provisions for credit losses on IRB exposures	Net values (a+b-c)
	Defaulted exposures	Nondefaulted exposures		Allocated in regulatory category of Specific	Allocated in regulatory category of General		
1 Loans	0	47,749,556	36,878	3,519	33,359	0	47,712,679
2 Debt securities	0	28,397,551	0	0	0	0	28,397,551
3 Off-balance sheet exposures	0	47,227,422	0	0	0	0	47,227,422
4 Total	0	123,374,529	36,878	3,519	33,359	0	123,337,651

### **9.3 TEMPLATE CRB: ADDITIONAL DISCLOSURE RELATED TO THE CREDIT QUALITY OF ASSETS (ANNUAL)**

Citi SA groups its exposures based on its credit quality as explained below:

- Performing exposures are exposures that are not non-performing exposures. Performing exposures are classified as Stage 1 or Stage 2 under IFRS 9
- Non-performing exposures (NPEs) are classified as Stage 3 under IFRS 9

Exposures are considered to be past due if contractually agreed payments of principal and/or interest remain unpaid by due date.

Financial assets are deemed to be credit-impaired when a credit loss event has occurred. Credit-impaired assets are classified as Stage 3 and in default. A loss allowance equal to the full lifetime expected credit losses is recognised. Credit losses are measured as the difference between the gross carrying amount and the present value of estimated future cash flows. Interest revenue is calculated based on the carrying amount of the asset, net of the loss allowance, rather than on its gross carrying amount.

Troubled Debt Restructurings ('TDRs') involve a restructuring when Citi SA, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider.

Citi SA applies a default definition that is consistent with that used for internal credit risk management purposes for the relevant financial instrument and considers qualitative indicators (for example, financial covenants) when appropriate. The definition of default used for this purpose is applied consistently to all financial instruments unless information becomes available that demonstrates another default definition is more appropriate for a particular financial instrument.

The Branch classifies an exposure as a Non-Performing Exposure ("NPE") if it satisfies either or both of the following criteria:

- There are material exposures which are more than 90 days past-due; and/or
- The obligor is assessed as unlikely to pay its credit obligations in full without realisation of collateral, regardless of the existence of any past-due amount or of the number of days past due.

A default shall be considered to have occurred and exposure classified as Stage 3 if the NPE is more than 90 days past due or the indications of unlikelihood to pay.

A NPE shall be considered not in default and classified as Stage 2 if it has no material exposures which are more than 90 days past-due or if the indications of unlikelihood to pay in section above have not occurred.

The table below shows Citi SA's exposures, majority of which are performing:

R'000	2021			Total
	Stage 1	Stage 2	Stage 3	
Loans and advances at amortised cost				
Balance 1 January	32,553	48,110	7,366	88,029

## 9.4 TEMPLATE CRC: QUALITATIVE DISCLOSURE REQUIRMENTS RELATED TO CREDIT RISK MITIGATION TECHNIQUES (ANNUAL)

Netting agreements, collateral and other techniques are used to mitigate the impact of risks borne by the organisation. Citi SA's credit risk mitigation processes are governed by group credit risk management policies.

Collateral evaluation and management policy and processes are set out in collateral policy, of which the policy's objective is to outline the key principles of collateral management.

Citi's core principles of collateral management are:

- Documentation
- Legal enforceability
- Valuation
- Collateral control

These core principles are designed to ensure that the risks associated with the value and liquidity of collateral being held in support of a facility are fully understood and documented and that they form part of the approval of the facility. Collateral received is subject to continuous monitoring. This includes establishing legal enforceability of the collateral and ensuring it is valued regularly.

## 9.5 TEMPLATE CR3: CREDIT RISK MITIGATION TECHNIQUES OVERVIEW (SEMI-ANNUAL)

	a	b	c	d	e
	Exposures unsecured: carrying amount	Exposures to be secured	Exposures secured by collateral	Exposures secured by financial guarantees	Exposures secured by credit derivatives
1 Loans	47,712,679				0
2 Debt securities	28,397,551				0
3 Total	76,110,230	0	0	0	0
4 Of which defaulted					0

## 9.6 TEMPLATE CRD: QUALITATIVE DISCLOSURE ON BANK'S USE OF EXTERNAL CREDIT RATINGS UNDER THE STANDARDISED APPROACH FOR CREDIT RISK (ANNUAL)

Citi SA uses external ratings from External Credit Agencies to determine the risk weightings to be applied to rated counterparties, in the calculation of its credit risk capital requirements (under the Standardised Approach). When counterparties are unrated, the Standardised Approach principles are applied.

Risk weightings for classes of exposure (Central Government & Central Bank, Public Sector Entities (PSE), Banks, Banks: Short Term, Securities firms, Securities firms: Short term, Corporate Entities) are available from External Credit Agencies.

Exposures to, or guaranteed by, central governments and central banks and denominated in local currency are risk-weighted at 0% using the Standardised Approach, provided they would be eligible under that approach for a 0% risk weighting.

## 9.7 TEMPLATE CR4: STANDARDISED APPROACH - CREDIT RISK EXPOSURE AND CREDIT RISK MITIGATION EFFECTS (SEMI-ANNUAL)

		a		b		c		d		e		f

## 10. COUNTERPARTY CREDIT RISK

### 10.1 TEMPLATE CCRA: QUALITATIVE DISCLOSURE RELATED TO COUNTERPARTY CREDIT RISK (ANNUAL)

Counterparty credit risk (CCR) is the risk arising from the possibility that the counterparty could default before the settlement of a transaction, without fulfilling its financial obligation. The CCR is a function of three elements: the potential future exposure (or replacement cost), the probability of default, and the loss in the event of default attributable to expectations of recovery.

At Citi, the counterparty risk framework is comprised of these three elements working in conjunction:

- Obligor Exposure Limits against both the PSE (Pre-Settlement Exposure, our high confidence level measure of exposure), and PSLE (Pre-Settlement Loan Exposure, our loan-equivalent measure)
- Obligor Risk Ratings (ORR), encapsulating our concept of probability of default, and defining the corporate level of aggregation of exposure and expression of risk appetite.
- Facility Risk Ratings, overlaying the concept of the loss given default on top of ORR. Built atop these foundation elements lies our internal concept of economic capital: the cushion required to cover unexpected variations on profit-and-loss over a one-year horizon.

Citi SA's measurement of exposure is performed at a counterparty level. The current exposure to the entity is a function of current mark-to-markets, and the effect of any legally enforceable exposure mitigations, such as Citi SA's ability to net transactions, or margin held with the right to set-off. The potential future exposure is likewise a function of the potential distribution of mark-to-markets under plausible market scenarios at each point out into the future to the maturity of the contracts, again considering the appropriate exposure mitigants.

Counterparty risk can be mitigated in one of several ways; mitigants that reduce the probability of a loss occurring, and mitigants that affect either the recovery in the event of default, or the size of the exposure.

- Netting and the right to set-off
- Margin agreements
- Collateral
- Early termination clauses and options to cancel

## Netting and the right to set off

Netting agreements, whether they are product specific (IFEMAs in FX), multi-product (the so-called Master Agreements, such as ISDAs), or specific to an underlying market (for example, multi-entity netting of positions in a single commodity), are a critical first step towards exposure mitigation. Where legally enforceable, they permit Citi SA to make a single claim in bankruptcy proceedings based on the net mark-to-market across transactions covered by the agreement.

Without a netting agreement, the likelihood is that Citi SA would have to pay out our liabilities under the bankruptcy proceedings, and then join the long queue of creditors to regain any assets. Therefore, netting agreements constitute both an exposure and a work-out-risk/recovery-risk mitigant.

The right to set-off, as an addendum or implicit to the netting agreement, allows Citi SA, in the event of default of the counterparty, to deliver in an asset of potentially a different asset-class against a known liability.

## Margin and Collateral

Citigroup policy clearly demarcates the term "margin" from "collateral", and the effect these have on the presentation of risk through the risk framework. Margin is tightly defined as a suite of eligible securities or cash (collectively termed 'near-cash') which, when held in a position over which Citi SA has legally perfected its interest, in an eligible legal jurisdiction, constitutes a valid third way out for the counterparty risk. For those qualifying situations, Citi SA classifies the contents of the account as "margin", and this reduces Citi SA's exposure for the margin held. For those situations where the securities do not qualify, they are termed "collateral", and an analysis is performed based on historical recoveries of similar securities to determine whether a facility-risk-rating alteration is appropriate to replicate the applicable loss-given default in Citi SA's wider equation of counterparty risk.

Citi SA adopts the standardized approach for measuring counterparty credit risk exposures which was effective 01 January 2021.

The following tables present the semi-annual counterparty credit risk (CCR) exposure by approach, credit valuation adjustment (CVA) capital charge and standardised approach of CCR exposures by regulatory portfolio and risk weights as of 31 December 2021.

## 10.2 TEMPLATE CCR1: ANALYSIS OF COUNTERPARTY CREDIT RISK (CCR) EXPOSURE BY APPROACH (SEMI-ANNUAL)

	a	b	c	d	e	f
	Replacement cost	Potential future exposure	Effective EPE	Alpha used for computing regulatory EAD	EAD post-CRM	RWA
1 SA-CCR (for derivatives)*	3,518,955	1,861,341		1.4	1,943,788	1,357,527
2 Internal models method (for derivatives and securities financing transactions, or SFTs)			0	0	0	0
3 Simple Approach for credit risk mitigation (for SFTs)					0	0
4 Comprehensive Approach for credit risk mitigation (for SFTs)					0	0
5 Value-at-risk (VaR) for SFTs					0	0
6 Total						1,357,527

## 10.3 TEMPLATE CCR2: CREDIT VALUATION ADJUSTMENT (CVA) CAPITAL CHARGE (SEMI-ANNUAL)

	a	b
	EAD post-CRM	RWA
<b>Total portfolios subject to the Advanced CVA capital charge</b>		
1 (i) VaR component (including the 3x multiplier)		0
2 (ii) Stressed VaR component (including the 3x multiplier)		0
3 All portfolios subject to the Standardised CVA capital charge	8,577,069	586,260
4 Total subject to the CVA capital charge	8,577,069	586,260

## 10.4 TEMPLATE CCR3: STANDARDISED APPROACH OF CCR EXPOSURES BY REGULATORY PORTFOLIO AND RISK WEIGHTS (SEMI-ANNUAL)

## 11. MARKET RISK

### 11.1 TEMPLATE MRA: QUALITATIVE DISCLOSURE REQUIREMENTS RELATED TO MARKET RISK (ANNUAL)

Market risk is the potential for losses arising from changes in the value of Citi SA's assets and liabilities resulting from changes in market variables such as interest rates, foreign exchange (FX) rates, equity prices, commodity prices and credit spreads, as well as their implied volatilities. Market risk emanates from both Citi SA's trading and non-trading portfolios.

Market risk is measured through a complementary set of tools, including factor sensitivities, VaR, and stress testing and monitored daily in risk reports that compare exposures in FX and DVO1 per currency and VaR against approved limits.

Each business is required to establish, with approval from Citi SA's Market Risk Management, a market risk limit framework for identified risk factors that clearly defines approved risk profiles and is within the parameters of Citi SA's overall risk appetite. These limits are monitored by Independent Market Risk, Citi's country and business ALCO and the Citigroup ALCO. In all cases, the businesses are ultimately responsible for the market risks taken and for remaining within their defined limits.

Price risk losses within Citi SA currently arise from fluctuations in the market value of trading and non-trading positions resulting from changes in interest rates and foreign exchange rates. Price risks are measured in accordance with established standards to ensure consistency across businesses and the ability to aggregate risk. Price risk are measured using various tools, including Interest Rate Gap Analysis, Interest Rate Exposure ("IRE") limits, stress and scenario analysis, which are applied to interest rate risk arising in the non-trading portfolios. At the discretion of Market Risk Management, Value at Risk (VaR) can sometimes be applied to the non-trading portfolio as a complementary measure.

The market risk of Citi SA's trading portfolios is monitored using a combination of quantitative and qualitative measures, including, but not limited to:

- Factor sensitivity
- Value at risk (VAR)
- Stress testing

Each trading portfolio across Citi SA's business segments has its own market risk limit framework encompassing these measures and other controls, including trading mandates, new product approval, permitted product lists and pre-trade approval for larger, more complex and less liquid transactions. All trading positions are marked to market, with the results reflected in earnings.

Currently Citi SA's trading book activity is undertaken in specific risk-taking units, which each have independent market risk limits. These limits are produced in conjunction with the business management based upon the strategies it wishes to run and the products and tenors permitted and approved by Independent Market Risk Management along with the Citi SA ALCO.

Market Risk Management adheres to Citi SA's single set of standards for the measurement of market risk to ensure consistency across businesses, stability in methodologies, and transparency of risk.

Trading-related revenue includes trading, net interest and other revenue associated with Citi SA's trading businesses. It excludes DVA, FVA and credit value adjustments (CVA) incurred due to changes in the credit quality of counterparties, as well as any associated hedges of that CVA. In addition, it excludes fees and other revenue associated with capital markets origination activities. Trading-related revenues are driven by both customer flows and the changes in valuation of the trading inventory.

### **Factor Sensitivities**

Factor sensitivities are used to measure an instrument's sensitivity to a change in value. These are expressed as the change in the value of a position for a defined change in a market risk factor, such as a change in the value of a bond for a one-basis point change in interest rates.

The methodologies underlying the factor sensitivity calculations must comply with Citi Market Risk Exposure Specifications, adhere to the interface specifications of the independent risk systems and are subject to reconciliation standards to ensure the integrity and completeness of the data. Citi's market risk management, works to ensure that factor sensitivities are calculated, monitored and limited for all material risks taken in the trading portfolios.

### **Value at Risk (VaR)**

The volatility of, and correlation between, market factors are used to calculate statistically- based portfolio risk measurements, such as VaR.

VaR estimates, at a 99% confidence level, the potential maximum loss in the value of a position or a portfolio under normal market conditions assuming a one-day holding period. VaR statistics, which are based on historical data, can be materially different across firms due to differences in portfolio composition, differences in VaR methodologies and differences in model parameters. As a result, Citi SA believes VaR statistics can be used more effectively as indicators of trends in risk-taking within a firm, rather than as a basis for inferring differences in risk-taking across firms.

Citi SA uses a single, independently approved VaR model. Citi SA's VaR includes positions that are measured at fair value; it does not include investment securities classified as AFS or HTM. Citi SA believes its VaR model is conservatively calibrated to incorporate fat-tail scaling and the greater of short-term and long-term market volatility.

VaR review and model validation process entails reviewing the model framework, major assumptions and implementation of the mathematical algorithm.

Back-testing, as required by the regulators and Basel III, is performed by Citi SA on a periodic basis, to assess the adequacy of allocated market risk capital (derived from VaR) as a cushion to absorb losses. This is performed as part of the model validation process, which tests the effectiveness of Citi's Regulatory VaR model.

Regulatory VaR back-testing is the process in which the daily one-day VaR, at a 99% confidence interval, is compared to the profit and loss. Given the conservative calibration of Citi SA's VaR model (as a result of taking the greater of short- and long-term volatilities and fat-tail scaling of volatilities), Citi SA would expect fewer exceptions under normal and stable market conditions. Periods of unstable market conditions could increase the number of back-testing exceptions.

### **Stress Testing**

Citi SA performs market risk stress testing on a regular basis to estimate the impact of extreme market movements. It is performed on individual positions and trading portfolios, as well as in aggregate, inclusive of multiple trading portfolios. Citi SA's market risk management, after consultations with the business, develops both historical and hypothetical future market stress scenarios, reviews the output of periodic stress testing exercise and uses the information to assess the ongoing appropriateness of exposure levels and limits, considering current and anticipated market conditions.

VaR cannot necessarily provide an indication of the potential size of loss when it occurs hence a comprehensive set of factors, sensitivity limits and stress tests are used, in addition to VaR limits.

Citi SA has approval from the PA to adopt the Internal Models Approach (IMA) for market risk.

The following tables present the semi-annual structure of desks for banks, RWA flow statements for market risk exposures, comparison of VaR estimates with gains/losses and the quarterly IMA values for trading portfolios as of 31 December 2021.

## 11.2 TEMPLATE MRC: THE STRUCTURE OF DESKS FOR BANKS USING THE IMA (SEMI-ANNUAL)

The Branch trading desk is structure as follows:

Main portfolio/desk:

- Local Markets South Africa

Sub-portfolio/desk:

- Local Markets Sales and Trading
- Local Markets Treasury
- New Desks

## 11.3 TEMPLATE MR2: RWA FLOW STATEMENTS FOR MARKET RISK EXPOSURES UNDER AN IMA (SEMI-ANNUAL)

		RWAs	Capital Requirements	RWAs	Capital Requirements
		Dec-21	Dec-21	Sep-20	Sep-20
1	VaR (higher of values a and b)	2,184,675	174,774	1,878,892	150,311
1a	Previous Day's VaR (Article 365(1) of the CRR (VaR t-1))	458,232	36,659	450,055	36,004
	Average of the Daily VaR (Article 365(1)) of the CRR on each of the preceding 60 business days (VaR avg) x Multiplication Factor (mc) in accordance with Article 365 of the CRR				
1b	Article 365 of the CRR	2,184,675	174,774	1,878,892	150,311
2	SVaR (higher of values a and b)	4,371,167	349,693	3,010,373	240,830
2a	Latest SVaR (Article 365(2) of the CRR (Svar t-1))	909,445	72,756	981,918	78,553
	Average of the SVaR (Article 365(2) of the CRR) during the preceding 60 business days (SVaR avg) x Multiplication Factor (ms) (Article 365 of the CRR)				
2b	Article 365 of the CRR	4,371,167	349,693	3,010,373	240,830
	Total	6,555,841	524,467	4,889,265	391,141

## 11.4 TEMPLATE MR3: IMA VALUES FOR TRADING PORTFOLIOS (QUARTERLY)

	a	
<b>VaR (10 day 99%)</b>		
1	Maximum value	62,378
2	Average value	46,914
3	Minimum value	36,110
4	Period end	36,513
<b>sVaR (10 day 99%)</b>		
5	Maximum value	106,820
6	Average value	90,089
7	Minimum value	72,756
8	Period end	4,561
<b>Incremental Risk capital requirement (99.9%)</b>

<b>Comprehensive Risk capital charge (99.9%)</b>		
13	Maximum value	-
14	Average value	-
15	Minimum value	-
16	Period end	-
17	Floor (standardised measurement method)	-

## 11.5 TEMPLATE MR4: COMPARISON OF VAR ESTIMATES WITH GAINS/LOSSES (SEMI-ANNUAL)

As Citi SA adopts the IMA for market risk, it is required by the PA to perform Back-testing daily to assess the adequacy of allocated market risk capital (derived from VaR) as a cushion to absorb losses.

Back-testing encompasses the comparison of ex-ante VaR to ex-post Profit and Loss (P&L) and is conducted at a total Citi SA level on a quarterly basis, as well as at a legal entity level (e.g., CBNA), daily. The P&L for back-testing purposes is defined as actual P&L, inclusive of all adjustments, except the market value adjustment for credit, but excludes commissions, fees, new trades etc.

When the back-testing process results in an 'exception' in actual/hypothetical back-testing, the Citi SA Mark-To-Market Risk Policy, requires the relevant Independent Market Risk Manager to:

- determine the reason for the exception
- maintain the documentation describing the reason for the exception
- ensure that corrective actions to the risk systems, if required, are carried out

For internal market risk reporting and monitoring, Citigroup uses a one-day 99% USD VaR as a risk metric. This is estimated from the 1% quantile of the P&L distribution of the corporate portfolio over a one-day period. Citi SA as a Franchise adopts the same model to compute VaR. VaR is calculated with internally developed models designed to capture the market risk of each specific product in the corporate portfolio. The one-day 99% USD VaR calculation is based on the Monte-Carlo simulations of 10 000 scenario paths of one-day changes in the market risk factors underlying the portfolio.

For the 250 day period (04 Jan 2021 - 31 Dec 2021) Citi SA had no actual back-testing exceptions at the overall desk level.

## 12. INTEREST RATE RISK IN THE BANKING BOOK

### 12.1 TEMPLATE IRRBBA: IRRBB RISK MANAGEMENT OBJECTIVES AND POLICIES (ANNUAL)

The Global Market Risk Management for Accrual Portfolios Policy ("MRMAP Policy") establishes the standards for defining, measuring, limiting and reporting Interest Rate Risk in the Banking Book (IRRBB) to ensure transparency, consistency and comparability of risk-taking activities at Citi SA.

Market Risk is the earnings risk from changes in interest rates, foreign exchange rates, and equity and commodity prices, and in their implied volatilities. Market Risk arises in IRRBB, as well as in Marked-to-Market portfolios. The focus of the MRMAP Policy is on IRRBB.

IRRBB refers to the current or prospective risk to the bank's capital and earnings arising from adverse movements in interest rates that affect Citi SA's banking book positions (all assets and liabilities on the balance sheet and any off-balance sheet items that generate net interest income).

It is the responsibility of the Independent Market Risk Manager and, where applicable the ALCO, to ensure that all Risk-Taking Units are identified and adhere to the MRMAP Policy. Oversight for managing IRRBB is the responsibility of the Independent Market Risk Manager, with ALCO as the primary governance committees for the balance sheet.

Interest Rate Exposure (IRE) measures the potential pre-tax impact on net interest income (NII) for Banking Book positions, due to defined shifts in interest rates over a specified reporting period. NII is the difference between the accrued interest income earned on assets and the interest expense paid on the liabilities. NII is affected by factors such as changes in the level of interest rates, volumes, and customer rates. Interest rate levels could change due to a parallel or non-parallel move in the Yield Curve, and it could happen either instantaneously as of a given date, or gradually over time.

When interest rates change, the present value and timing of future cash flows change. This inadvertently changes the underlying value of a bank's assets, liabilities, and off-balance sheet items and hence its economic value. Changes in interest rates impact Citi SA's earnings by altering interest rate-sensitive income and expenses, thus directly affecting its NII. Excessive IRRBB can pose a significant threat to Citi SA's current capital base and/or future earnings if not managed appropriately.

Citi SA's operations are subject to the risk of interest rate fluctuations to the extent that interest-earning assets (including investments) and interest-bearing liabilities mature or re-price at different times or in differing amounts. Risk management activities are aimed at optimising NII, maintaining market interest rate levels consistent with Citi SA's business strategies. Interest rate derivatives are primarily used to bridge the mismatch in the re-pricing of assets and liabilities. This is performed in accordance with the guidelines established by Citi SA's ALCO. Part of Citi SA's return on financial instruments is obtained from controlled mismatching of the dates on which interest receivable on assets and interest payable on liabilities are next reset to market rates or, if earlier, the dates on which the instruments mature.

Price risk are measured using various tools, including Interest Rate Gap Analysis, Interest Rate Exposure ("IRE") limits, stress and scenario analysis, which are applied to interest rate risk arising in the non-trading portfolios. At the discretion of Market Risk Management, Value at Risk (VaR) can sometimes be applied to the non-trading portfolio as a complementary measure.

Basis Risk is the risk to earnings or capital arising from interest rates movement due to changing rate relationships between different yield curves. Citi SA has no Basis risk.

Citi SA's principal measure of risk to NII is IRE. IRE measures the change in expected net interest revenue in each currency resulting solely from unanticipated changes in forward interest rates. Citi SA's estimated IRE incorporates various assumptions including prepayment rates on loans, customer behaviour and the impact of pricing decisions.

Stress tests are performed using historical and hypothetical scenarios developed at Citigroup level in addition to +/-100 and +/-200 bps interest rate shifts for IRE and EVS.

The following table present the annual quantitative information on IRRBB as of 31 December 2021.

## 12.2 TEMPLATE IRRBB1: QUANTITATIVE INFORMATION ON IRRBB (ANNUAL)

	Delta EVE	Delta NII
Parallel up	-262	13
Parallel down	413	13
Steeper	112	
Flattener	-142	
Short rate up	-245	
Short rate down	275	
Maximum	-262	13
Tier 1 capital	9,108	9,108
Max % of Tier 1 Capital	3%	0

## 13. OPERATIONAL RISK

Operational Risk is the risk of loss resulting from inadequate or failed internal processes, systems, or human factors, or from external events. It includes reputation and franchise risks associated with Citi's business practices or market conduct. It also includes the risk of failing to comply with applicable laws, regulations, ethical standards or Citi policies. Operational Risk does not encompass strategic risk or the risk of loss resulting solely from authorized judgments made with respect to taking credit, market, liquidity, or insurance risk.

There are five Event Types (Categories) used by Citi for categorizing Operational Risk:

- Clients, Products and Business Practices
- Execution, Delivery and Process Management
- Fraud, Theft and Unauthorized Activity
- Employment Practices and Workplace Environment
- Physical Asset and Infrastructure

Citi maintains an Operational Risk Management (ORM) Framework with a Governance Structure to ensure effective management of Operational Risk across Citi. The Governance Structure presents three lines of defense: business management accountability, oversight by independent control functions and independent assessments by internal audit.

Operational Risk Management oversees the implementation of the ORM Framework for the management of operational risk across Citi.

Citi applies the Standardised Approach for measuring the capital requirements for operational risk.

The following table presents the Operational Risk RWA as of 31 December 2021.

### 13.1 OPERATIONAL RISK RWA

	2021	2022
Operational Risk - RWA	6,017	5,685

## 14. REMUNERATION

### 14.1 REMA – REMUNERATION POLICY (ANNUAL)

This policy document provides an overview of the Compensation process prevalent in Citi and needs to be reviewed in conjunction with the CITI GLOBAL Compensation Philosophy. The aim is to enable you as an employee to understand how your compensation is determined i.e. the components that make up your compensation. It also helps you to understand that your compensation is a total package that is directly linked to your performance.

Citi aims to make the compensation process transparent, wherein open discussions between the manager and the employee are encouraged and decisions are taken in a manner that is fair, consistent and explainable. This would include achievements and areas of development.

#### Compensation Philosophy

Employee compensation is a critical tool for Citi to attract and retain top talent and successfully execute our corporate goals. Effective compensation programs appropriately balance the incentives offered to employees who take risks to achieve financial and competitive performance objectives and the need to prudently manage those risks along with other imperatives. The Personnel and Compensation Committee of Citi's Board of Directors (the "Committee") oversees the design and operation of Citi's compensation programs. To assist with this objective, the Committee is advised by its independent consultants and delegates certain tasks to Citi management as appropriate. Citi routinely reviews and

revises our compensation programs to reflect changing circumstances. We use such programs as tools to help Citi properly balance risk-taking and risk-mitigating incentives.

### **CITI's Principle Compensation Objectives**

The principal objectives of our compensation program are listed below:

- Incentivize conduct that aligns with shareholder and other stakeholder interests
- Reinforce a business culture based on accountability, achieving excellence and maintaining the highest ethical and control standards through Citi's Leadership Principles
- Encourage prudent individual and group decision-making in regards to risk consistent with applicable regulatory guidance and Citi's Mission and Value Proposition Statement
- Function as a tool to attract and retain the best talent and to reward talent for engaging in appropriate behaviors that support Citi's corporate goals
- Encourage behaviors that are in the best interests of our customers, shareholders and the goals of the organization, including environmental and social principles
- Align realized pay with achievement of important risk and control, regulatory, strategic and financial-based objectives

### **Shareholder and Other Stakeholder Alignment**

Use a scorecard approach with financial metrics and nonfinancial objectives, including a focus on environmental, social and corporate governance, to link pay to performance to compensate executives and other senior managers.

Provide meaningful portions of incentive compensation for executives and other senior managers in the form of equity to help to build a culture of ownership and to align employee interests with those of shareholders. Defer the delivery of significant portions of equity-based incentive compensation for executives and other senior managers over a number of years to tie compensation earned to the returns of long-term shareholders.

Require that executive officers hold a substantial amount of Citi stock for at least one year after the end of their service as executive officers.

### **Ethics, Culture and Leadership Principles**

Develop a culture that supports accountability and an environment that discourages unethical conduct, through appropriate and consistent compensation and employment decisions. Embody

Citi's Leadership Principles that represent the qualities, behaviors and expectations we all must exhibit to deliver on our mission of enabling growth and economic progress by:

- We Take Ownership - challenging one another to a higher standard in everything we do
- We Deliver with Pride - striving for client excellence, controls excellence and operational excellence
- We Succeed Together - valuing and learning from different perspectives to surpass stakeholder expectations

Ensure that compensation decisions across our workforce are equitable.

Communicate throughout the organization that acting with integrity at all times is the foundation of our business and ensure that senior leadership's tone reflects Citi's ethical standards and culture. Promote culture and conduct through performance assessments, incentive compensation programs and, where appropriate, disciplinary actions.

### **Risk Management and Regulatory Guidance**

Design incentives that reward a thoughtful balance of risk and return and penalize undue risk-taking.

Exercise discretion concerning risk-related compensation outcomes in a disciplined, proportionate and consistent manner.

Encourage prudent risk-taking by all employees who manage or influence material risks through a combination of design features, including:

- rigorous performance
- discretionary compensation funding and individual bonus determination processes that reflect risk-adjusted performance, and
- deferrals that keep a meaningful portion of incentives at risk for future performance and control outcomes.

Retrospectively and periodically evaluate incentive compensation program results, recognizing that validation and monitoring may reveal inconsistent application of standards or the inappropriate exercise of discretion, and then make adjustments to in-process and future compensation decisions when necessary.

Communicate clearly to all employees that poor risk and control management practices and imprudent risk-taking activity will lead to an adverse impact on incentive compensation, including the loss of incentive compensation and the reduction or elimination of previously awarded incentive compensation.

Reinforce consistent shared accountability through the organization, starting with the Executive Management Team. Involve Citi's Independent Risk, Independent Compliance Risk Management and Internal Audit functions in compensation governance and oversight.

Design incentive compensation programs with the recognition that global regulation of bank incentive compensation is continuously evolving and that Citi's programs must be responsive to these regulations, emerging trends and best practices.

Where appropriate, develop innovative and industry-leading approaches that reflect regulatory considerations in compensation structures and designs.

#### **Attract, Retain and Reward Talent**

Provide compensation programs that are competitive within global financial services to attract the best talent to successfully execute the company's strategy.

Differentiate individual compensation to reflect employees' current or prospective contributions, based on both financial and non-financial performance, such as risk and control behaviors, and to reward those employees who demonstrate ingenuity and leadership.

Clearly and consistently communicate Citi's approach to compensation throughout the year, cascading such communications broadly to employees through key value statements such as Citi's Code of Conduct, Leadership Principles and the statements and actions of senior management and managers generally.

#### **Encourage the Best Behaviors**

Provide for adjustment, cancellation and clawback of incentive compensation in cases of improper risk-taking, misconduct, and material adverse outcomes.

Compensate employees based on the achievement of goals, embodiment of Citi's Leadership Principles, and risk-adjusted performance demonstrated over time, balanced with appropriate recognition for short-term results and contributions. Exercise discretion in disciplined and predictable ways to enhance the incentive for, and perceived value of, good performance and the certainty of equitable and proportionate consequences of inappropriate conduct.

### **Align Pay with Performance**

Adjust compensation from year-to-year and over extended periods to reflect market rates as well as overall Citi and individual executive performance, with goals tied to key areas of accountability and factors that each executive influences including:

- Risk and Controls performance
- Financial performance
- Client / Franchise performance
- Leadership performance

Citi SA's compensation policy is consistent with the Group Compensation Philosophy which is available online:

[https://www.citigroup.com/citi/investor/data/comp\\_phil\\_policy.pdf?ieNocache=805](https://www.citigroup.com/citi/investor/data/comp_phil_policy.pdf?ieNocache=805)

The following tables presents the annual Remuneration Awarded, Special Payments and Deferred Remuneration as of 31 December 2021.

#### 14.2 REM1 – REMUNERATION AWARDED DURING THE FINANCIAL YEAR (ANNUAL)

Remuneration amount ZAR millions <sup>(i)</sup>		a	b	
		Senior management <sup>(ii)</sup>	Other material risk-takers <sup>(iii)</sup>	
1	Fixed remuneration	Number of employees	17	-
2		Total fixed remuneration (rows 3 + 5 + 7) <sup>(iv)</sup>	45.8	-
3		Of which: cash-based	45.8	-
4		Of which: deferred	-	-
5		Of which: shares or other share-linked instruments	-	-
6		Of which: deferred	-	-
7		Of which: other forms	-	-
8		Of which: deferred	-	-
9	Variable remuneration	Number of employees	17	-
10		Total variable remuneration (rows 11 + 13 + 15) <sup>(v)</sup>	28.9	-
11		Of which: cash-based	21.5	-
12		Of which: deferred	-	-
13		Of which: shares or other share-linked instruments <sup>(vi)</sup>	7.4	-
14		Of which: deferred	7.4	-
15		Of which: other forms	-	-
16	Of which: deferred	-	-	
17	Total remuneration (2 + 10)	74.7	-	

##### Additional Notes:

- Reporting in provided in ZAR. All non-ZAR awards are converted using SMART FX rates for December 2021.
- Senior Management refers to all managers who are part of the Citi Country Coordination Committee (Executive Management Committee of South Africa)
- Under CITI NA South Africa, there are no managers who are classified as material risk takers
- Fixed remuneration includes salary and the value of any pension, benefits and medical aid allowance.
- Variable remuneration awarded in respect of 2021 performance year.
- Share-based awards are made in Citi shares and represent value at grant.

#### 14.3 REM2 – SPECIAL PAYMENTS (ANNUAL)

Special payments are categorized as:

- Guaranteed bonuses: payments of guaranteed bonuses during the financial year.
- Sign-on awards: payments allocated to employees upon recruitment during the financial year.
- Severance payments: payments allocated to employees dismissed during the financial year.

There were no special payments made to senior management during the reporting period 31 December 2021.

Special payments ZAR millions <sup>(i)</sup>	Guaranteed bonuses		Sign-on awards		Severance payments	
	Number of employees	Total amount	Number of employees	Total amount	Number of employees	Total amount
Senior Management	0	0	0	0	0	0
Other material risk-takers	0	0	0	0	0	0

**14.4 REM3 – DEFERRED REMUNERATION (ANNUAL)**

Deferred and retained remuneration. ZAR millions <sup>(i)</sup>	a	b	c	d	e
	Total amount of outstanding deferred remuneration <sup>(ii)</sup>	Of which: total amount of outstanding deferred and retained remuneration exposed to ex post explicit and/or implicit adjustment	Total amount of amendment during the year due to ex post explicit adjustments	Total amount of amendment during the year due to ex post implicit adjustments	Total amount of deferred remuneration paid out in the financial year <sup>(iii)</sup>
<b>Senior management</b>					
Cash	4.2	4.2	-	-	1.0
Shares	2.9	2.9	-	-	2.0

<b>Total</b>	<b>13.1</b>	<b>13.1</b>	<b>-</b>	<b>-</b>	<b>4.2</b>

## Additional Notes:

Value of all non-ZAR cash, share awards and share-linked instruments are converted using SMART FX rates for 31 December 2021.

Value of outstanding share awards and share-linked instruments is calculated using Citi closing share price as at 31 December 2021.

Shares and share-linked instruments are considered paid when vested. The Fair Market Value (FMV) at vest is determined by the closing New York Stock Exchange stock price for Citigroup common stock the trading day immediately prior to the award's vest date.
