Rating Agency Perspectives

	Fitch			S&P			Moody's		
	Rating	Notches to Supported Rating	Outlook	Rating	Notches to Supported Rating	Outlook	Rating	Notches to Supported Rating	Outlook
Citigroup Inc. Senior Debt Commercial Paper Subordinated Debt Preferred Stock	A F1 A- BB+	-	Stable	A- A-2 BBB+ BB+	1	Negative	Baa1 P-2 Baa3 Ba2	2	Stable
Citibank, N.A. Senior Debt Long-Term Deposits Short-Term Obligations	A+ AA- F1	-	Stable	A A A-1	1	Positive	A1 A1 P-1	4	Stable
Evolving Methodologies	On May 19th, Fitch revised the U.S. Support Rating Floor (SRF) to 'No Floor' from 'A'. The SRF set the lower bound on the long-term ratings of U.S. G-SIBs. Additionally, Fitch introduced a rating differential between the long-term ratings of a bank's holding and operating companies, expressing the agency's view that regulation is enforcing structural subordination at the holding company level.			On April 27th, S&P published its "additional loss absorbing capacity" (ALAC) criteria as a new component of its bank rating methodology. ALAC recognizes that new regulations requiring banks to hold material amounts of "bail-in-able" liabilities can reduce the likely default of a bank's senior obligations. S&P will continue to roll-out the implementation of its criteria globally, including the U.S., as regulatory regimes move closer towards an effective resolution regime. The rating outlook on Citigroup and other U.S. GSIBs remains negative, reflecting S&P's ongoing evaluation of government support.			On March 16th, Moody's published its revised methodology for rating banks globally. Key changes to the methodology include: a streamlined Baseline-Credit-Assessment (BCA); the introduction of a Loss Given Failure (LGF) liability analysis, to reflect the expected loss of each instrument class under new resolution regimes; and a new indicator, the Counterparty Risk Assessment (CRA), to assess the probability of default on operating obligations.		
Recent Developments	As a result of its methodology change, Fitch upgraded the long-term ratings and deposit ratings of Citi's material U.S. operating companies by one notch. The long-term ratings were upgraded to 'A+' from 'A' for Citibank, N.A. and Citigroup Global Markets Inc.; and the deposit ratings were upgraded to 'AA-' from 'A+' for Citibank, N.A.			On July 23rd, S&P upgraded Citigroup's stand-alone credit profile (SACP), or unsupported rating, by 1-notch to 'a-' from 'bbb+', which also resulted in a 1-notch upgrade to Citigroup's hybrid capital instruments to 'BB+' from 'BB'. S&P affirmed the 'A/A-1' issuer credit ratings on Citigroup's core operating subsidiaries, including Citibank, N.A. and Citigroup Global Markets Inc., with government support reduced from 2-notches to 1-notch, in line with its methodology for a U.S. highly systemically important institution with an 'a-' SACP. S&P also revised the outlook on the ratings of Citi's operating subsidiaries, including Citibank, N.A. and Citigroup Global Markets Inc., to Positive from Stable, as the long-term rating could be upgraded if the 1-notch of government support is removed and Citigroup's ALAC is sufficient to contribute 2-notches of uplift.			On May 28th, Moody's concluded its reviews on 13 global investment banks. As a result, Moody's affirmed Citi's BCA of 'baa2' and upgraded the operating companies' LT-deposit and senior unsecured ratings 1-notch to 'A1' from 'A2'. Moody's also upgraded the holding companies' senior unsecured debt rating by 1-notch, to 'Baa1' from 'Baa2' and its preferred stock rating to 'Ba2' from 'Ba3'.
