1. Citi’s Common Equity Tier 1 Capital ratio and related components reflect full implementation of the U.S. Basel III rules. Risk-weighted assets are based on the Basel III Advanced Approaches for determining total risk-weighted assets.
2. Preliminary.
3. Excludes issuance costs related to outstanding preferred stock in accordance with Federal Reserve Board regulatory reporting requirements.
4. Common Equity Tier 1 Capital is adjusted for accumulated net unrealized gains (losses) on cash flow hedges included in accumulated other comprehensive income that relate to the hedging of items not recognized at fair value on the balance sheet.
5. The cumulative impact of changes in Citigroup’s own creditworthiness in valuing liabilities for which the fair value option has been elected and own-credit valuation adjustments on derivatives are excluded from Common Equity Tier 1 Capital, in accordance with the U.S. Basel III rules.
6. Includes goodwill “embedded” in the valuation of significant common stock investments in unconsolidated financial institutions.
7. Assets subject to 10% / 15% limitations include MSRs, DTAs arising from temporary differences and significant common stock investments in unconsolidated financial institutions. For all periods presented, the deduction related only to DTAs arising from temporary differences that exceeded the 10% limitation.
