(1) Managed basis is applicable only in North America, as securitizations are not done in any other region. Managed basis presentation includes results from both the on-balance sheet loans and off-balance sheet loans, and excludes the impact of card securitization activity. Managed disclosures assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as the Company's owned loans.

(2) Net impact of Securitization Activity includes the removal of securitization-related items that are part of GAAP revenues such as the gain on sale of credit card loans, mark-to-market revenue for interests retained in securitized assets classified as Trading, and net credit losses on loans that are considered sold for GAAP purposes.

(3) Gross interest revenue earned divided by average managed loans.

(4) Includes certain fees that are recorded as interest revenue.

(5) Total Revenues, net of Interest Expense, less Net Credit Losses and Policy Benefits and Claims.

Reclassified to conform to the current period's presentation.

(1) Risk Capital is defined as the amount of capital needed to cover unexpected economic losses during extreme events. Return on Risk Capital is defined as income divided by Risk Capital. Return on Invested Capital is a similar calculation but includes adjustments for goodwill and intangibles in both the numerator and denominator, similar to those necessary to translate return on tangible equity to return on total equity. Return on Risk Capital and Return on Invested Capital are non-GAAP performance measures. Management believes Return on Risk Capital is useful to make incremental investment decisions and serves as a key metric for organic growth initiatives. Return on Invested Capital is used for multi-year investment decisions and as a long term performance measure.

(2) Average Risk Capital is net of the cross-sector diversification. Average Invested Capital includes the difference between Tangible Equity and Risk Capital, which is also included in the Total Citigroup Return on Invested Capital.

(3) Total Citigroup Return on Invested Capital equals Citigroup Return on Common Equity.
