Citigroup Inc.

U.S. Liquidity Coverage Ratio Disclosure

For the quarterly period ended 3/31/2026

Overview:

In 2014, federal banking agencies adopted the U.S. Liquidity Coverage Ratio (LCR) rule to help ensure that large banking organizations, such as Citigroup Inc. (Citigroup or Citi), maintain adequate levels of high-quality liquid assets (HQLA) to meet their liquidity needs under a short-term stress scenario. These banks generally must maintain an amount of HQLA equal to or greater than their projected total net cash outflows over a prospective 30-day period. The LCR rule defines three categories of HQLA—Level 1, Level 2A, and Level 2B liquid assets—and sets forth qualifying criteria for HQLA and limitations for an asset’s inclusion in the HQLA amount.

The LCR is calculated by dividing HQLA by estimated net outflows assuming a stressed 30-day period, with the net outflows determined by standardized stress outflow and inflow rates prescribed in the LCR rule. The outflows are partially offset by contractual inflows from assets maturing within 30 days. Similar to outflows, the inflows are calculated based on prescribed factors to various assets categories, such as retail loans as well as unsecured and secured wholesale lending. The minimum LCR requirement is 100%.

The disclosure template below sets forth Citi’s average HQLA, cash outflows, cash inflows and the resulting LCR for the period indicated, as required by the public disclosure requirements for the LCR rule. The “Unweighted Amount” column represents quarterly average balances for each category of the LCR calculation which have not been adjusted by the respective LCR factors. The “Weighted Amount” column represents the unweighted average amounts multiplied by the respective LCR factor for each category of the LCR calculation, as prescribed by the LCR rule.

Liquidity Coverage Ratio:

Consolidated Citigroup Average LCR for the quarter ended March 31, 2026 In millions of U.S. Dollars		3/31/2026	
		Average Unweighted Amount	Average Weighted Amount
HIGH-QUALITY LIQUID ASSETS			
1.	Total eligible high-quality liquid assets (HQLA), of which:	614,160	613,905
2.	Eligible level 1 liquid assets	612,487	612,487
3.	Eligible level 2A liquid assets	1,662	1,412
4.	Eligible level 2B liquid assets	11	5
CASH OUTFLOW AMOUNTS			
5.	Deposit outflow from retail customers and counterparties, of which:	427,000	46,474
6.	Stable retail deposit outflow	124,181	3,725
7.	Other retail funding	235,509	25,684
8.	Brokered deposit outflow	67,311	17,065
9.	Unsecured wholesale funding outflow, of which:	1,007,175	382,675
10.	Operational deposit outflow	544,210	135,917
11.	Non-operational funding outflow	451,391	235,183
12.	Unsecured debt outflow	11,575	11,575
13.	Secured wholesale funding and asset exchange outflow	831,949	147,818
14.	Additional outflow requirements, of which:	519,567	120,914
15.	Outflow related to derivative exposures and other collateral requirements	41,815	34,436
16.	Outflow related to credit and liquidity facilities including unconsolidated structured transactions and mortgage commitments	477,752	86,478
17.	Other contractual funding obligation outflow	5,020	5,020
18.	Other contingent funding obligations outflow	336,262	12,221
19.	TOTAL CASH OUTFLOW	3,126,974	715,122
CASH INFLOW AMOUNTS			
20.	Secured lending and asset exchange cash inflow	759,836	95,003
21.	Retail cash inflow	9,799	4,900
22.	Unsecured wholesale cash inflow	58,453	45,835
23.	Other cash inflows, of which:	33,531	33,531
24.	Net derivative cash inflow	8,602	8,602
25.	Securities cash inflow	3,772	3,772
26.	Broker-dealer segregated account inflow	21,158	21,158
27.	Other cash inflow	-	-
28.	TOTAL CASH INFLOW	861,620	179,269
			Amount ¹
29.	HQLA AMOUNT		613,905
30.	TOTAL NET CASH OUTFLOW AMOUNT EXCLUDING MATURITY MISMATCH ADD-ON		535,853
31.	MATURITY MISMATCH ADD-ON		2,231
32.	TOTAL UNADJUSTED NET CASH OUTFLOW AMOUNT		538,084
33.	OUTFLOW ADJUSTMENT PERCENTAGE		100%
34.	TOTAL ADJUSTED NET CASH OUTFLOW AMOUNT		538,084
35.	LIQUIDITY COVERAGE RATIO (%)		114.1%
¹ The amounts reported in this column may not equal the calculation of those amounts using component amounts reported in rows 1-28 due to technical factors such as the application of the level 2 liquid asset caps, the total inflow cap, and for depository institution holding companies subject to subpart G, the application of the modification to total net cash outflows.			

Main Drivers and Changes in LCR:

As set forth in the table above, Citi continued to maintain a strong average LCR above the 100% regulatory minimum. Citi's average LCR for the quarter ended March 31, 2026 was 114%. Citi's average LCR decreased from 115% for the quarter ended December 31, 2025 primarily driven by growth in trading and client activity in Markets.

Citi's average HQLA includes HQLA held by its operating entities that are eligible for inclusion in Citi's consolidated LCR, pursuant to the U.S. LCR rules. These amounts include the HQLA needed to meet the minimum requirements at these entities as well as any amounts in excess of these minimums that are available to be transferred to other entities within Citi.

For additional information about Citi's HQLA, see Citi's First Quarter of 2026 Quarterly Report on Form 10-Q and 2025 Annual Report on Form 10-K.

Composition of High-Quality Liquid Assets:

Eligible Average-High Quality Liquid Assets for the quarter ended March 31, 2026 in millions of U.S. Dollars	Unweighted Amount	Weighted Amount
Central Bank Balances	288,551	288,551
Level 1 Securities	323,937	323,937
Eligible level 1 liquid assets	612,487	612,487
Eligible level 2A liquid assets	1,662	1,412
Eligible level 2B liquid assets	11	5
TOTAL ELIGIBLE HIGH-QUALITY LIQUID ASSETS (HQLA)	614,160	613,905

As set forth in the table above, approximately 100% of Citi's \$614 billion of average weighted HQLA consisted of Level 1 assets. As a percentage of total average HQLA, Level 1 assets mainly included approximately 47% of excess cash deposited at Central Banks, 35% of U.S. Treasuries, 6% of U.S. agency and agency mortgage-backed securities, and 12% of foreign sovereign debt, principally government bonds from Japan, Mexico, Korea, China, and the United Kingdom. Citi held 75% of its average HQLA in U.S. Dollars (USD). In addition, less than 1% consisted of level 2A securities that largely consisted of U.S. agency and agency mortgage-backed securities.

Concentration of Funding Sources:

Citi's funding strategy is to maintain a funding profile that is diversified by structure, tenor and currency. Citi closely monitors and manages the tenor of its funding sources to ensure it can meet liquidity needs under different stress scenarios and different time horizons.

Citi's primary funding sources include (i) corporate and consumer deposits via Citi's bank subsidiaries, including Citibank, N.A. (CBNA), (ii) long-term debt (primarily senior and subordinated debt) mainly issued by Citigroup Inc., as the parent, and Citibank, and (iii) stockholders' equity. These sources may be supplemented by short-term borrowings that generally include (i) secured funding transactions and (ii) commercial paper and borrowings from the Federal Home Loan Bank (FHLB) and other market participants.

For CBNA, deposits represent its main funding source. In addition, to diversify its funding sources, CBNA accesses the capital markets through several mechanisms, including a CBNA benchmark debt program, securitizations and FHLB borrowings. Citi's non-bank entities are largely funded through a Citigroup Inc. benchmark debt program, supplemented by secured funding, customer-related debt, and commercial paper issuances.

Citi's global liquidity risk management policy addresses concentration of funding sources through a limit and trigger framework, including counterparty, maturity and funding channel concentrations. For secured financing transactions, Citi takes into consideration the quality of the underlying collateral. The concentrations are monitored daily and reported to Citi's Treasurer and the Finance Chief Risk Officer (CRO). Breaches of limits and triggers are also reported to the Citigroup and CBNA Asset and Liability Committees (ALCOs). For additional information on Citi's liquidity risk management policy and its ALCOs, see "Liquidity Risk Management Function and Interaction with Other Functional Areas" below.

Derivatives Exposures and Potential Collateral Calls:

In the ordinary course of business, Citi enters into various types of derivative transactions, including bilateral transactions that are over-the-counter and transactions settled via exchanges with central counterparties. Citi enters into derivatives contracts covering interest rate, foreign currency, commodity and other market/credit risks for the purpose of trading and acting as a market maker or to hedge Citi's own risk profile.

During the life span of a derivatives transaction, Citi may be required to post initial margin or variation margin. The requirement to post margin can negatively impact Citi's funding and liquidity. In addition, ratings downgrades by the three major rating agencies may also have a negative impact on Citi's funding and liquidity due to reduced funding capacity and/or the need to post additional cash or securities collateral to counterparties.

Citi believes it maintains sufficient liquidity reserves to counter potential liquidity outflows from derivatives activities under various stress scenarios.

For additional information on potential collateral calls from derivatives, see Citi's First Quarter of 2026 Quarterly Report on Form 10-Q and Citi's 2025 Annual Report on Form 10-K.

Currency Mismatch in LCR:

The U.S. LCR is calculated and reported on a consolidated basis and in a common currency, USD. As noted above, a majority of Citi's liquidity is held in USD, which can be readily converted to other currencies in the event of stress. To minimize liquidity mismatches, including currency mismatches in the LCR, Citi seeks to fund assets in the same currency and, at the same time, monitors the potential risk from foreign currency mismatches.

To the extent mismatches arise, Citi employs a comprehensive currency limits framework to assess foreign currency capacity to meet funding needs and the ability to convert currencies to provide liquidity buffer under stress conditions. The framework incorporates currency matching of projected cash flows through applying discounts and size and tenor restrictions to determine the foreign currency capacity required to cover USD shortfalls as well as shortfalls in other currencies under various volatility and stress scenarios. If the offset capacity is not sufficient to cover currency shortfalls, appropriate actions are taken to reduce the mismatch. The capacity and assumptions are reviewed and approved by Citi's independent Risk function.

Liquidity Risk Management Function and Interaction with Other Functional Areas:

Citi manages liquidity risk through a standardized global risk governance framework that includes Citi's liquidity risk management policy, methodology, processes and controls. The policy establishes the framework for sound management of Citi's liquidity risk, to facilitate transparency and comparability of liquidity risk-taking activities, and supports Citi's maintenance of adequate liquidity. The liquidity risk management policy is a global single policy document applicable to all international clusters and legal entities that comprise Citi. It is designed to ensure global consistency and adherence to the regulatory requirements. This is achieved through oversight of cluster and in-country treasurers who reinforce governance in their respective clusters. The liquidity risk management framework requires establishment of an appropriate risk appetite to ensure that each entity remains within its liquidity risk tolerance levels. Citi's Treasurer and the Finance CRO oversee the policy. Citi's independent Risk function is responsible for governance of liquidity risk management and provides analytical challenge to the firm's liquidity risk management framework. The Citigroup and CBNA Boards of Directors review and approve liquidity management strategies and policies.

Citi Corporate Treasury has overall responsibility for managing Citi's liquidity and HQLA. Citi's liquidity is managed centrally by Corporate Treasury, in conjunction with cluster and in-country treasurers, with oversight provided by Citi's independent Risk function and various ALCOs and Country Coordinating Committee at the individual entity, cluster, country and business levels. Pursuant to this approach, Citi's HQLA is managed with emphasis on asset-liability management and entity-level liquidity adequacy throughout Citi.

Citi's CRO and Chief Financial Officer co-chair Citigroup's ALCO, which includes Citi's Treasurer and other senior executives. The ALCO sets the strategy of the liquidity portfolio and monitors

portfolio performance. Significant changes to portfolio asset allocations require approval by the ALCO. Citi also has other ALCOs, which are established at various organizational levels to ensure appropriate oversight for individual entities, countries, franchise businesses and clusters, serving as the primary governance committees for managing Citi's balance sheet and liquidity. As a supplement to ALCO, Citi's Funding and Liquidity Risk Committee (FLRC) is focused on funding and liquidity risk matters. The FLRC reviews and discusses the funding and liquidity risk profile of, as well as risk management practices for Citi and CBNA and reports its findings and recommendations to each relevant ALCO as appropriate.

For additional information on Citi's liquidity risk, liquidity risk management and HQLA, see Citi's First Quarter of 2026 Quarterly Report on Form 10-Q and Citi's 2025 Annual Report on Form 10-K.
