Citigroup Inc.

U.S. Liquidity Coverage Ratio Disclosure

For the quarterly period ended 6/30/2024

Overview:

In 2014, federal banking agencies adopted the U.S. Liquidity Coverage Ratio (LCR) rule to help ensure that large banking organizations, such as Citigroup Inc. (Citigroup or Citi), maintain adequate levels of high-quality liquid assets (HQLA) to meet their liquidity needs under a short-term stress scenario. These banks generally must maintain an amount of HQLA equal to or greater than their projected total net cash outflows over a prospective 30-day period. The LCR rule defines three categories of HQLA—Level 1, Level 2A, and Level 2B liquid assets—and sets forth qualifying criteria for HQLA and limitations for an asset’s inclusion in the HQLA amount.

The LCR is calculated by dividing HQLA by estimated net outflows assuming a stressed 30-day period, with the net outflows determined by standardized stress outflow and inflow rates prescribed in the LCR rule. The outflows are partially offset by contractual inflows from assets maturing within 30 days. Similar to outflows, the inflows are calculated based on prescribed factors to various assets categories, such as retail loans as well as unsecured and secured wholesale lending. The minimum LCR requirement is 100%.

The disclosure template below sets forth Citi’s average HQLA, cash outflows, cash inflows and the resulting LCR for the period indicated, as required by the public disclosure requirements for the LCR rule. The “Unweighted Amount” column represents quarterly average balances for each category of the LCR calculation which have not been adjusted by the respective LCR factors. The “Weighted Amount” column represents the unweighted average amounts multiplied by the respective LCR factor for each category of the LCR calculation, as prescribed by the LCR rule.

Liquidity Coverage Ratio:

Consolidated Citigroup Average LCR for the quarter ended June 30, 2024 In millions of U.S. Dollars		6/30/2024	
		Average Unweighted Amount	Average Weighted Amount
HIGH-QUALITY LIQUID ASSETS			
1.	Total eligible high-quality liquid assets (HQLA), of which:	541,620	541,591
2.	Eligible level 1 liquid assets	541,423	541,423
3.	Eligible level 2A liquid assets	197	167
4.	Eligible level 2B liquid assets	-	-
CASH OUTFLOW AMOUNTS			
5.	Deposit outflow from retail customers and counterparties, of which:	424,783	47,228
6.	Stable retail deposit outflow	85,032	2,551
7.	Other retail funding	273,551	28,650
8.	Brokered deposit outflow	66,200	16,026
9.	Unsecured wholesale funding outflow, of which:	848,020	331,810
10.	Operational deposit outflow	436,244	108,939
11.	Non-operational funding outflow	399,355	210,450
12.	Unsecured debt outflow	12,421	12,421
13.	Secured wholesale funding and asset exchange outflow	625,150	90,744
14.	Additional outflow requirements, of which:	455,504	114,432
15.	Outflow related to derivative exposures and other collateral requirements	34,205	31,607
16.	Outflow related to credit and liquidity facilities including unconsolidated structured transactions and mortgage commitments	421,299	82,825
17.	Other contractual funding obligation outflow	4,107	4,107
18.	Other contingent funding obligations outflow	281,174	10,248
19.	TOTAL CASH OUTFLOW	2,638,738	598,569
CASH INFLOW AMOUNTS			
20.	Secured lending and asset exchange cash inflow	590,260	74,551
21.	Retail cash inflow	8,748	4,374
22.	Unsecured wholesale cash inflow	54,804	42,311
23.	Other cash inflows, of which:	17,123	17,123
24.	Net derivative cash inflow	7,704	7,704
25.	Securities cash inflow	2,868	2,868
26.	Broker-dealer segregated account inflow	6,551	6,551
27.	Other cash inflow	-	-
28.	TOTAL CASH INFLOW	670,934	138,358
			Average Amount¹
29.	HQLA AMOUNT		541,591
30.	TOTAL NET CASH OUTFLOW AMOUNT EXCLUDING MATURITY MISMATCH ADD-ON		460,211
31.	MATURITY MISMATCH ADD-ON		3,762
32.	TOTAL UNADJUSTED NET CASH OUTFLOW AMOUNT		463,972
33.	OUTFLOW ADJUSTMENT PERCENTAGE		100%
34.	TOTAL ADJUSTED NET CASH OUTFLOW AMOUNT		463,972
35.	LIQUIDITY COVERAGE RATIO (%)		116.7%

¹The amounts reported in this column may not equal the calculation of those amounts using component amounts reported in rows 1-28 due to technical factors such as the application of the level 2 liquid asset caps, the total inflow cap, and for depository institution holding companies subject to subpart G, the application of the modification to total net cash outflows.

Main Drivers and Changes in LCR:

As set forth in the table above, Citi continued to maintain a strong average LCR above the 100% regulatory minimum. Citi's average LCR for the quarter ended June 30, 2024 was 117%. Citi's average LCR was unchanged sequentially, as Citi's average HQLA and net outflows decreased proportionately during the two periods.

Citi's average HQLA includes HQLA held by its operating entities that are eligible for inclusion in Citi's consolidated LCR, pursuant to the U.S. LCR rules. These amounts include the HQLA needed to meet the minimum requirements at these entities as well as any amounts in excess of these minimums that are available to be transferred to other entities within Citi.

For additional information about Citi's HQLA, see Citi's Second Quarter of 2024 Quarterly Report on Form 10-Q and 2023 Annual Report on Form 10-K.

Composition of High-Quality Liquid Assets:

Eligible Average-High Quality Liquid Assets for the quarter ended June 30, 2024 in millions of U.S. Dollars	Unweighted Amount	Weighted Amount
Central Bank Balances	215,208	215,208
Level 1 Securities	326,216	326,216
Eligible level 1 liquid assets	541,423	541,423
Eligible level 2A liquid assets	197	167
Eligible level 2B liquid assets	-	-
TOTAL ELIGIBLE HIGH-QUALITY LIQUID ASSETS (HQLA)	541,620	541,591

During the second quarter of 2024, Citi enhanced its allocation of HQLA that is non-transferrable between entities. This enhancement does not impact Citi's LCR ratio. As set forth in the table above, approximately 100% of Citi's \$542 billion of average weighted HQLA consisted of Level 1 assets. As a percentage of total average HQLA, Level 1 assets mainly included approximately 40% of excess cash deposited at Central Banks, 49% of U.S. Treasuries, 5% of U.S. agency and agency mortgage-backed securities, and 6% of foreign sovereign debt, principally government bonds from Japan, Korea, Mexico, Hong Kong, and India. Citi held 72% of its average HQLA in U.S. Dollars (USD). In addition, less than 1% consisted of level 2A securities that largely consisted of U.S. agency and agency mortgage-backed securities.

Concentration of Funding Sources:

Citi's funding strategy is to maintain a funding profile that is diversified by structure, tenor and currency. Citi closely monitors and manages the tenor of its funding sources to ensure it can meet liquidity needs under different stress scenarios and different time horizons.

Citi's primary funding sources include (i) corporate and consumer deposits via Citi's bank subsidiaries, including Citibank, N.A. (CBNA), (ii) long-term debt (primarily benchmark senior and subordinated debt and what Citi refers to as customer-related debt, consisting of structured notes, such as equity- and credit-linked notes, as well as non-structured notes), and (iii) stockholders' equity. These sources may be supplemented by short-term borrowings that generally include (i) secured funding transactions and (ii) commercial paper and borrowings from the Federal Home Loan Bank (FHLB) and other market participants.

For CBNA, deposits represent its main funding source. In addition, to diversify its funding sources, CBNA accesses the capital markets through several mechanisms, including a CBNA benchmark debt program, securitizations and FHLB borrowings. Citi's non-bank entities are largely funded through a Citigroup Inc. benchmark debt program, supplemented by secured funding, customer-related debt, and commercial paper issuances.

Citi's global liquidity risk management policy addresses concentration of funding sources through a limit and trigger framework, including counterparty, maturity and funding channel concentrations. For secured financing transactions, Citi takes into consideration the quality of the underlying collateral. The concentrations are monitored daily and reported to Citi's Treasurer and the Finance Chief Risk Officer (CRO). Breaches of limits and triggers are also reported to the Citigroup and CBNA Asset and Liability Committees (ALCOs). For additional information on Citi's liquidity risk management policy and its ALCOs, see "Liquidity Risk Management Function and Interaction with Other Functional Areas" below.

Derivatives Exposures and Potential Collateral Calls:

In the ordinary course of business, Citi enters into various types of derivative transactions, including bilateral transactions that are over-the-counter and transactions settled via exchanges with central counterparties. Citi enters into derivatives contracts covering interest rate, foreign currency, commodity and other market/credit risks for the purpose of trading and acting as a market maker or to hedge Citi's own risk profile.

During the life span of a derivatives transaction, Citi may be required to post initial margin or variation margin. The requirement to post margin can negatively impact Citi's funding and liquidity. In addition, ratings downgrades by the three major rating agencies may also have a negative impact on Citi's funding and liquidity due to reduced funding capacity and/or the need to post additional cash or securities collateral to counterparties.

Citi believes it maintains sufficient liquidity reserves to counter potential liquidity outflows from derivatives activities under various stress scenarios.

For additional information on potential collateral calls from derivatives, see Citi's Second Quarter of 2024 Quarterly Report on Form 10-Q and 2023 Annual Report on Form 10-K.

Currency Mismatch in LCR:

The U.S. LCR is calculated and reported on a consolidated basis and in a common currency, USD. As noted above, a majority of Citi's liquidity is held in USD, which can be readily converted to other currencies in the event of stress. To minimize liquidity mismatches, including currency mismatches in the LCR, Citi seeks to fund assets in the same currency and, at the same time, monitors the potential risk from foreign currency mismatches.

To the extent mismatches arise, Citi employs a comprehensive currency limits framework to assess foreign currency capacity to meet funding needs and the ability to convert currencies to provide liquidity buffer under stress conditions. The framework incorporates currency matching of projected cash flows through applying discounts and size and tenor restrictions to determine the foreign currency capacity required to cover USD shortfalls as well as shortfalls in other currencies under various volatility and stress scenarios. If the offset capacity is not sufficient to cover currency shortfalls, appropriate actions are taken to reduce the mismatch. The capacity and assumptions are reviewed and approved by Citi's independent Risk function.

Liquidity Risk Management Function and Interaction with Other Functional Areas:

Citi manages liquidity risk through a standardized global risk governance framework that includes Citi's liquidity risk management policy, methodology, processes and controls. The policy establishes the framework for sound management of Citi's liquidity risk, to facilitate transparency and comparability of liquidity risk-taking activities, and supports Citi's maintenance of adequate liquidity. The liquidity risk management policy is a global single policy document applicable to all regions and legal entities that comprise Citi. It is designed to ensure consistency across regions and adherence to the regulatory requirements. This is achieved through oversight of local treasurers who reinforce governance in their respective regions. The liquidity risk management framework requires establishment of an appropriate risk appetite to ensure that each entity remains within its liquidity risk tolerance levels. Citi's Treasurer and the Finance CRO oversee the policy. Citi's independent Risk function is responsible for governance of liquidity risk management and provides analytical challenge to the firm's liquidity risk management framework. The Citigroup and CBNA Boards of Directors review and approve liquidity management strategies and policies.

Citi's CRO and Chief Financial Officer co-chair Citigroup's ALCO, which includes Citi's Treasurer and other senior executives. The ALCO sets the strategy of the liquidity portfolio and monitors portfolio performance. Significant changes to portfolio asset allocations require approval by the ALCO. Citi also has other ALCOs, which are established at various organizational levels to ensure appropriate oversight for individual entities, countries, franchise businesses and regions, serving as the primary governance committees for managing Citi's balance sheet and liquidity. Pursuant to this approach, Citi's HQLA is managed with emphasis on asset-liability management and entity-level liquidity adequacy throughout Citi. As a supplement to ALCO, Citi's Funding and Liquidity Risk Committee (FLRC) is focused on funding and liquidity risk

matters. The FLRC reviews and discusses the funding and liquidity risk profile of, as well as risk management practices for Citi and CBNA and reports its findings and recommendations to each relevant ALCO as appropriate.

Citi Corporate Treasury has overall responsibility for managing Citi's liquidity and HQLA. Citi's liquidity is managed centrally by Corporate Treasury, in conjunction with local treasurers, with oversight provided by Citi's independent Risk function and various ALCOs at the individual entity, region, country and business levels.

For additional information on Citi's liquidity risk, liquidity risk management and HQLA, see Citi's Second Quarter of 2024 Quarterly Report on Form 10-Q and 2023 Annual Report on Form 10-K.
